**Wine Intelligence** applies a mix of research methodologies led by our on-the-ground experienced China team and partners to ensure reliable and robust research findings

## **vinitrac** Quantitative online survey

### Online survey with **1,000** Chinese upper middle class imported wine drinkers in 9 major cities

- Bespoke questions in a fully bespoke or omnibus Wine Intelligence Vinitrac® survey. Questions can include:
  - Label testing
  - Advertisement testing
  - Brand and region health tracking
  - ...and more (contact us for more examples)
- Insights into wine consumption behaviours and attitudes of Chinese consumers
- Representative of upper middle class drinkers of imported wine in 9 major cities in China (Beijing, Shanghai, Guangzhou, Wuhan, Shenyang, Chengdu, Hangzhou, Shenzhen and Chongqing)
- Target cities can be expanded according to your needs

## Qualitative trade interviews

### One-on-one interviews with members of the Chinese wine trade to understand trends and opportunities in the Chinese market

- We have a panel of **30 experts** in various parts of the Chinese wine trade who we consult regularly, including major wine importers, on-trade and off-trade retailers, and wine educators
- We do in-depth trade interviews in **12 tier 1 and tier 2 cities** in China
- Potential research questions include:
  - How do you best target importers and distributors?
  - What are the main trends of channel attractiveness?
  - What are current distributor needs when developing our wine portfolio?

## Qualitative consumer in-depth interviews and focus groups

### Qualitative in-depth interviews or focus groups with Chinese wine consumers

- Experience of conducting consumer interviews and focus groups drawn across **15 tier 1 and tier 2 cities**
- Potential research questions include:
  - What does the decision making process look like when buying or ordering wine?
  - How do consumers perceive a specific brand?

## Qualitative consumer pulse panel

### Qualitative online quick survey with Chinese consumers

- Our panel of consumers drawn from across China to share feedback on questions that require quick answers
- In the past, pulse panels have been used for:
  - Generating input to be used in the brand name generation process
  - Assessing reactions to a new wine label design
  - Selecting a Chinese brand name translation
  - Checking a new wine brand name for unintended brand name associations in Mandarin and Cantonese
